1. Overview

Have you ever received “LIKE !” on SNS that has actual value?
Imagine, if a “LIKE !” on SNS gives you a real value of “GOLD”?
This app will make it possible!

“Photap” is the application that has been developed by EVERY PROJECT from EVERYONE’s Blockchain Institute. It is an interactive app that connects persons posting photos and activities, referred as “Performers” and persons who want to support performers and their activities, referred as “Supporters” to make performer’s dream come true together.

3 major outstanding features of “Photap” App

① Link “LIKE !” with “GOLD”, the most stable value in the world, and use for tipping.
② The valuable “LIKE ! “ can be exchanged to a variety of products and cryptocurrencies.
③ Performers with a high reputation could become a “PRO” performer.

Along with this “Photap” app development, we are going to list 2 coins simultaneously in exchange markets, EVERY ORIGINAL (EVEO) and EVERY GOLDPEG (EVEG).【*1】
We have designed EVEO as investment coin, EVEG as stable coin whose value will be linked with GOLD Price. 【*2】

EVEO could be exchanged with EVEG, and EVEG could be changed to “LIKE ! Points”.
【*1】 EVEG will be listed only in ATAIX exchange in Estonia.
【*2】 The stable coin is a kind of coin that is less price volatility and has sustainable value.
   EVEG will be linked with the GOLD price to make “LIKE” point value stable but it will be not holding gold as collateral.

Features of EVEO

① EVEO could be exchanged to EVEG which is also listed in exchange and this function potentially makes selling pressure on EVEO decrease.
② By providing benefits to EVEG holders depending on the number of share on hand, the number of EVEO share in the market will be decreased and this could increase its value higher. (See Reference on 5-1. Technology)

※ EVERY PROJECT operated by EVERYONE’s Blockchain Institute is a non-profit project that makes system and project which are specialized in marketing. economies in our own DEX (Distributed Exchange) with increasing participants through our systems and projects. Along with the process, we will be collecting members, and at the final, we aim to co-create Virtual Economic Zone in our own Decentralized Exchange.
Please see details at EVERY PROJECT Homepage : https://everyonecompany.or.jp/
2. Vision
   We add solid value to a “LIKE !” and maximize the potential of “LIKE !” function all over the world.

3. Mission
   ~ Everyone is a producer ~
   With valuable “LIKE !”, we create interactive new-generation’s entertainment industry.

4. Photap Application
   4-1. Background
   What purposes are you using Social Media for?
   We believe that most users will be categorized into one of the above.

   In recent years, Social Media incredibly increased the share all over the world. According to our research in April 2019, more than 5 billion people users click more than 100 billion “LIKES !” per day.
   Therefore, it is easily imagined that it will be a revolutionary business model if we could add actual value to this “LIKES !”.

   On the other hand, it is not easy at all for those who are using Social Media to make themselves famous. Among intensive competition with 5 billion users, there is only a handful of people who can really stand out.
   We wonder what if we could bring more attention to outstanding talented performers with transparent and fair measures?

   With these thoughts, our answer to fulfill the wishes of a large number of users is a fusion of valuable “LIKE !” and “Entertainment Star Produce System”.
   This fusion created “Photap”. This will allow people to use valuable “LIKES !” and earn money more easily and efficiently while pursuing their beautiful dreams.
4-2. Contents

“Photap” is an open and interactive New-Generation’s Entertainment Star Produce App from Japan.

“Performer” just upload photos (Photo-Up) and “Supporter” just tap favorite photos (Photo-Tap). That’s all to participate in “Photap”.

A “Performer” with dream post their interesting and fascinating photos and activities on the app, and then individuals, investors, companies and also people from the entertainment industry will be “Supporter” for performer’s dream and they will tip “LIKE ⌁” which is linked to the value of GOLD.

In this way, even if “performers” have less personal connection or economic power, outstanding “performer” can catch chance to be “PRO” with fairness.

“Performers” and “Supporters” are united together, using valuable “LIKES ⌁” and completing various missions to make performers’ dreams come truth. This is “Photap”.

The Strengths of “Photap”

“LIKE! points” linked with GOLD
- Use “LIKE! points” linked with globally stable gold value as tipping.

Exchanges of “LIKE! points”
- “LIKE! points” could be exchanged for products, services and cryptocurrencies, etc.
- Use of a third-party prepaid certificate license for the exchange.

Entertainment Productions take part
- Performers of various genres can be produced by the participation of multiple entertainment productions.

The Merits of “Photap”

Supporters | Merits | Performers
---|---|---
- Participation is completely free.
- Fulfill favorite Performers’ dreams together.
- Receive various benefits every time supported Performers complete their personal missions.
- Easy to apply by posting one photo.
- If a Performer passes a regular audition, activities after debut will be promised.
- The Performers can acquire fans before their debut.
- “LIKE! points” could be exchanged for products, services and cryptocurrencies, and anyone can earn pocket money.
4-3. How to use

**How to get “LIKE ! points”**

① Free distribution by “Photap”
   - Login Bonus: Distributed every time a user logs in
   - Special Bonus: Distributed according to the number of “Like !”, the time spent on the site and the number of comments, etc.
   ※ Free “LIKE ! points” are provided by sponsoring companies

② EVEO/EVEG (listed coins) could be exchanged for “LIKE ! points”

※ 1 EVEG=1,000,000 “LIKE ! points”

③ Purchased by Credit Card
   ※ 1 “LIKE ! points” = around 0.005 JPY
